

# PsychConsult<sup>®</sup> Provider Clinical Documentation and Treatment Planning

PsychConsult's Clinical Documentation creates a fully automated Electronic Health Record (EHR), enabling clinicians to edit, electronically sign, and secure documents to comply with organizational policies. PsychConsult's comprehensive treatment plan functionality gives clinicians the capability to identify problems and their associated objectives and goals. Versioning capabilities provide a mechanism for demonstrating treatment progression. Together, clinical documentation and treatment planning save time, improve the continuity and quality of care, and help your organization meet accreditation requirements.

## Clinical Documentation

- ▶ Create access and view clinical documents for assessments, on-going treatment and discharge for all levels of service.
- ▶ Use standard data entry fields, such as check boxes and drop-down lists, to ensure consistent data entry.
- ▶ Sign documents electronically using password authentication.
- ▶ Grant or restrict user access to consumers' documents based on security permissions.
- ▶ Design document templates specific to scheduled clinical services.
- ▶ Enforce rules to prevent bills from being produced when documentation is incomplete.
- ▶ Require co-signatures and automatically route documents to the co-signer.
- ▶ Build text from simple check boxes and drop-down choices.

The screenshot displays a web-based interface for a 'Review of Systems' form. The form is titled 'Review of Systems' and is part of a document created on 05/27/2015. The interface includes a left-hand navigation menu with options such as 'Current Clinical Status', 'Review of Systems', 'Medication List', 'Allergies', 'Mental Status Examination', 'Diagnosis', 'Patient History', 'Family History', 'Suicide Risk Assessment', 'Fall Risk Assessment', 'Weight Screening', 'Tobacco Screening', 'CPT Add On', 'Medication Education', 'Referral and Transfer', 'Clinical Summary', and 'Print Preview'. The main content area is divided into several sections, each with a set of checkboxes for symptoms: 'Constitutional Symptoms' (Weight gain/loss, Appetite change, Fever/chills, Fatigue), 'Eyes' (Dry eyes, Vision loss, Double vision, Eye redness, Eye pain), 'Ears, Nose, Mouth, and Throat' (Tongue/mouth movements, Snoring, Nasal drainage, Sore throat, Tooth pain), 'Cardiovascular' (Heart racing, Palpitations, Chest pain, High blood pressure), 'Respiratory' (Shortness of breath, Cough, Wheezing, Coughing up blood/mucus), 'Gastrointestinal' (Heartburn/indigestion, Diarrhea, Constipation, Nausea, Vomiting, Change in bowel habits, Black/bloody stool), and 'Genitourinary'. A 'Documents' sidebar on the right contains a 'Search' button.

## Clinical Documentation and Treatment Planning

### Treatment Planning

- ▶ Define elements, structure, and layouts to reflect your organization's unique qualities.
- ▶ Create treatment plans that are multi-disciplinary and/or program-specific.
- ▶ Modify and save preconfigured symptoms and problems to create customized content.
- ▶ Augment content with free text to individualize plans.
- ▶ Incorporate symptoms and problems captured in initial assessments.
- ▶ Assign coordinators to create and manage tasks.
- ▶ Route treatment plans automatically to assigned clinicians for approval and review.
- ▶ Integrate treatment plan content with progress notes and clinical documents.
- ▶ Maintain multiple versions of treatment plans.
- ▶ Capture consumer and clinician digital signatures.
- ▶ Notify staff of date-sensitive events, such as treatment plan creation, signatures and reviews.
