

PsychConsult[®] Provider Order Entry/MAR

Automation of order entry can improve your clinicians' productivity, reduce errors, and speed the delivery of services. Doctors can order diagnostic tests, services, and medications, as well as make referrals – all free of the paper-based environment. Organizations can track and record all medications through the Medication Administration Record (MAR). Compliance is addressed with a configurable entry, signing, and verification process.

- ▶ Enter orders for organization-specific tests and electronically transmit to laboratories, radiology or departments within your organization.
- ▶ Use simple one-click functionality to reorder, sign, co-sign or verify individual orders.
- ▶ Configure an approval and verification process to your organization's specifications.
- ▶ Access multiple order views, including unsigned, unverified, co-signature required, all orders and order status.
- ▶ Retrieve unit-specific work lists including orders to verify, orders to sign and orders to co-sign.
- ▶ Define flexible order schedules as well as PRN with the capability to electronically transmit orders.
- ▶ Enter and track service orders, including seclusion, restraints, vitals and observation.
- ▶ Create order sets to simplify data entry.
- ▶ Submit referrals to other professionals in your organization.
- ▶ Increase consumer safety by accessing drug interaction information and allergy alerts at the point of prescribing, utilizing Medi-Span's drug information database.
